

# Stockroom Inventory Manager

## NO MORE LOST PENCILS... TOTAL ACCOUNTABILITY FOR YOUR CENTRAL STOCKROOM!

Problems with central stockroom management and tracking disbursement of items to departments, divisions, or cost centers are things of the past! With *Stockroom Inventory Manager*, you can track every single item by quantity, price, location and destination. Spot pending shortages before they occur. You will always know how much to order, when to order and always have enough stock on hand to cover your needs - but never too much!

With just a touch of a key, the status of any given item is instantly known. Reports showing departmental usage, inventory levels, reorder list and more are only a keystroke away! With *Stockroom Inventory Manager*, you will cut waste, save time, complete reports quicker with less effort, and eliminate math errors forever! FINALLY YOU WILL HAVE ABSOLUTE ACCOUNTABILITY FOR EVERY PENNY AND EVERY PAPERCLIP!

### QUICK TRANSACTION ENTRY:

- Browse style transaction entry and editing.
- Quick Inventory and department ID look up and help.
- Add inventory items "on-the-fly".
- Transaction batch reports verify input and indicate entry errors before they become problems.

### WITH A FEW SIMPLE KEYSTROKES...

- Browse through the list of all inventory items, and instantly display current information, including month and year to date usage and receipt history.
- Automatically create suggested reorder quantities.
- Know exactly what was used by each department.
- Review & edit transactions before posting.

### QUICKLY GENERATE REPORTS:

- Inventory item status / activity report.
- Item usage report by month showing dollar,

quantity or averages.

- Minimum level reminder, reorder report.
- Usage summary by charge number.
- Usage history by department.
- Monthly receiving report, physical count list.
- Discrepancy report to reconcile on-hand vs. counted quantities.
- Track inventory in multiple bins - or locations.
- Track department budgets.
